SUMMARY

Full-stack engineer building web and mobile applications that solve real business problems. Work spans fintech, e-commerce and administration systems - from Laravel REST APIs with mobile money integration to NestJS marketplaces and React dashboards. Focus on reliable products with clean code, strong security and a good user experience.

EXPERIENCE

Founder & Lead Engineer - Meroe Systems

2026 - Present

Independent software studio. Design and delivery of fintech platforms, point-of-sale systems, marketplaces and business tools - from API and database design through deployment and support.

IT Officer

2026 - Present

Administer and support internal systems and databases; manage user access and configurations; monitor performance and report to support decision-making; work with departments to improve digital workflows.

Web Developer (freelance)

2023 - Present

Design, build and maintain responsive websites and web applications, front-end and back-end, with a focus on user experience, performance and security.

Assistant Registrar General

2025 - 2026

Student registration and academic records: enrolment and tuition data, file verification, results entry, graduate lists for higher-education authorities, and student services, in coordination with admissions and academic affairs.

SELECTED PROJECTS

AMISAM - Savings & microfinance platform

Web console + React Native member app on one REST API. MTN Mobile Money, automatic admin fee, KYC, disbursements, monthly lottery, full audit trail. Laravel, React Native, MySQL.

Restaurant POS - Service geometry

Tablet-first POS for dine-in, takeaway and delivery. Server-authoritative totals, live kitchen pass over SSE, PIN sign-in, offline-first, ships web and desktop. Node 24, TypeScript, node:sqlite, React.

SOKO - Multi-vendor marketplace

Monorepo with a NestJS API, React storefront and Flutter app sharing one set of Zod contracts. Admin review queue, real-time updates. NestJS, Prisma, PostgreSQL, Redis, Flutter, Docker.

Sijil - Offline POS & billing

Offline-first retail POS: barcode scanning, Bluetooth thermal receipts, stock ledger rebuilt from movements, integer money. Single-till and multi-till editions; English/Arabic RTL. Flutter, Hive, Node.

Rwanda ID Scanner

Reads the Rwandan national ID by camera - PDF417 decode, on-device MRZ OCR, pluggable parsers, clipboard/CSV/webhook export. Nothing leaves the device. Flutter, ML Kit.

EDUCATION

B.Sc. - University of Medical Sciences and Technology

2019 - 2024

Focus on information systems, data management and applying technology to real-world problems.

SKILLS

Backend: Laravel, NestJS, Node.js, PHP, TypeScript - Frontend: React, JavaScript, HTML/CSS

Mobile: Flutter/Dart, React Native - Data: PostgreSQL, MySQL, SQLite, Hive, Prisma

Also: REST API design, WebSockets/SSE, Docker, mobile money (MTN MoMo), offline-first sync, data analysis & reporting
